CROP REPORT

2015

Yolo County

Department of Agriculture and Weights & Measures

“We exist to satisfy the needs of our clients, not just to produce an output.” (Unknown Author)

YOLO COUNTY STRATEGIC GOALS

- Advance innovation
- Champion job creation and economic opportunities
- Collaborate to maximize success
- Enhance and sustain the safety net
- Preserve and ensure safe and crime free communities
- Preserve and support agriculture
- Protect open space and the environment
- Provide fiscally sound, dynamic and responsive service

VISION

Our vision is to serve agriculture, the business community and the residents of Yolo County, through collaboration and partnership using the most efficient, effective and progressive means available, doing our part to ensure Yolo County has preserved agriculture and is a safe, healthy, and enjoyable environment in which to work, play and live.

MISSION

Our mission is to promote and protect Yolo County agriculture and the environment, ensure the health and safety of our residents, and foster confidence and equity in the marketplace through the fair and equitable enforcement of the laws, regulations, and ordinances enacted by the people of the State of California and the County of Yolo.

VALUES

Employees of the Department of Agriculture and Weights & Measures, in an effort to accomplish the Department’s Vision and Mission, share these values in the course of our work and our employment with Yolo County.

John Young

AGRICULTURAL COMMISSIONER

SEALER OF WEIGHTS AND MEASURES

June 2016

Karen Ross, Secretary, California Department of Food and Agriculture and Honorable Board of Supervisors, County of Yolo.

Pursuant to the provisions of Sections 2279 and 2272 of the California Food and Agricultural Code, I am pleased to present the Yolo County Crop Report for 2015. This annual publication summarizes the acreage production and valuation of Yolo County's agricultural commodities. These figures denote gross value of production and do not attempt to reflect net farm income.

The \$661,752,000 gross value of Yolo County's agricultural production for 2015 was \$135,211,000 below 2014's value of \$796,963,000*; this represents a 17% decrease in value. The majority of this decline is due to continued severe drought conditions coupled with overall lower commodity prices.

Processing tomatoes remain Yolo County's leading commodity with a gross value of \$139,135,000. Almonds, Wine Grapes, Organic Production, and Walnuts are among the top five commodities according to gross value. Sunflower Seed, Rice, Alfalfa, Cattle, and Nursery Products round out the top ten commodities for 2015.

I would like to express my appreciation to all the farmers, ranchers, and agencies who contributed data making this report possible. Special recognition for the compilation of this report goes to Jenni King, Danielle Ballard, and Dennis Chambers.

To see this or any previous crop reports online, or to learn about the programs and services provided by the Yolo County Department of Agriculture, visit: www.yolocounty.org/ag.

Respectfully submitted,

John Young

Agricultural Commissioner

SUSTAINABLE AGRICULTURE REPORT 2015

Some insects and plant diseases are world renowned for the destruction they cause to agriculture, urban landscapes, and forests. Most of these pests are exotic to Yolo County, and could quickly infest a territory as rich in agriculture as ours. The Agricultural Commissioner's office maintains a diligent Exclusion Program to prevent pests from entering our borders. Inspectors keep watch over incoming plant shipments to nurseries, farms, research facilities, box stores, and individuals. In 2015, over 950 plant shipments were inspected and 670 were rejected for Federal or State Quarantine violations for live pest finds. Yolo County led the State in pest interceptions at the United States Postal Service in California for 2015. Over **200 serious pests** were stopped from entering the 20 County delivery area covered by the Postal Sectional Center in West Sacramento. Funding was obtained from State and Federal sources to continue inspections in 2016.

In 2015, Yolo County Staff inspected 796 certified fields which amounted to over 19,900 acres. Most fields are inspected twice for diseases of concern and must pass inspection to meet certified seed standards. Yolo County Staff work diligently to keep destructive pests and diseases from affecting county agriculture.

795 sites/19,909 acres

SUSTAINABLE AGRICULTURE REPORT 2015

Yolo County also keeps a comprehensive Detection Program, as a second line of defense and early warning system against inadvertent pest introductions. This system of insect trapping identifies foreign pests before they can become established, avoiding major financial and environmental impacts. In 2015 over 1,000 Yolo County residents cooperated to host residential traps for Mediterranean, Oriental, and Melon Fruit Flies; Gypsy Moth, Japanese Beetle, Glassy-winged Sharpshooter, and Light Brown Apple Moth. Additional Glassy-winged Sharpshooter traps were placed in plant nurseries. European Grapevine Moth and Apple Maggot traps were situated among corresponding host crops. In total, traps were checked 5,000 times by Yolo County Pest Detection Trappers. In 2015, one instance of Apple Maggot was intercepted. No other targeted insects were detected.

Biological Control

Pest	Agent/Mechanism	Scope of Program
Puncture Vine <i>Tribulus terrestris</i>	Seedhead Weevil <i>Microlarinus lareynil</i>	Countywide
Yellow Starthistle <i>Centaurea solstitialis</i>	Seedhead Weevil <i>Bandastemus orientalis</i>	Countywide

Ash Whitefly <i>Syphoninus phillyreae</i>	Parasitic Wasps <i>Encarsia parenopea</i>	Countywide

YOLO COUNTY COMMUNITY SUPPORTED AGRICULTURE

Community Supported Agriculture (CSA) consists of members or “shareholders” of a farm or garden who cover the anticipated costs of the farm operation and farmer’s salary. The consumer joins a CSA program and purchases, in advance, a share of the farm’s crop each week, delivered to a predetermined spot, usually near the customer’s home or worksite.

YOLO COUNTY CERTIFIED FARMERS MARKETS

The certified farmers market concept is an effort to re-establish the traditional link between farmers and consumers. Certified farmers markets are locations approved by the agricultural commissioner where certified farmers offer for sale only those agricultural products they grow themselves.

This Crop Report, and every Crop Report since 1937, is available on the Yolo County Agriculture Department's website. Along with the Crop Report archives, online information is also available about the roles, responsibilities, services and programs provided by the Yolo County Agriculture Department. Electronic forms and handouts can be found as well as links to other agriculture-related resources.

In some cases, visitors to certain webpages can subscribe to receive e-mail updates.

Visit the Yolo County Agriculture Department's website: www.yolocounty.org/ag
