I would like to suggest that a fund to assist worthy clients in funding a down payment for houses they could pay the mortgage on.

I would like to suggest tiny houses being built to assist homeless have a clean livable place to live whereby they could have sanitary conditions such as community law dry and showers and toilets

I am sorry tossed those living on F St without facilities.

I have clients who have mortgage payments but can't find homes for multiple generational families that are affordable. I would like to see assistance for homes that might need fixing up include assistance for repairs to those who purchase a home needing repairs.

Thank you for your consideration

Judith Blum
