Subject: My updated public comment for DRAFT 2021-2029 Housing Element

CAUTION: External email. Please verify sender before opening attachments or clicking on links.

Hi Jessica,

This is a follow-up to my public comment email previously submitted on 2021May9, for the DRAFT 2021-2029 Housing Element for the City of Davis.

Here is improved wording for my suggested addition to the Goals list on page 212 (PDF p222), now more comprehensive than before.

Goal 7: Safe, Healthy Living. Promote housing designs and environments that improve safety and health of residents. Provide for restful sleep by establishing noise limits. Provide for toxin-free clean air by phasing out all forms of residential smoke and avoiding unnecessary airborne dust. Design housing to discourage crime, for example locate outdoor bicycle parking in visible locations to discourage theft.

Thanks in advance for adding the above paragraph to the final version of the Housing Element.

John
