Sprinter Van Interior

# USES

---

- **Rescue and Extraction**

The removal of downed or injured officers or persons in a hazardous or hostile environment.

- **Transportation of Personnel**

The transportation or insertion of SWAT personnel into an inner perimeter position.

- **Transportation of Equipment**

Delivery of equipment such as a throw phone, loud speaker, etc. into the inner perimeter of a tactical incident.

# USES

---

- **Provide “Hard Cover”**  
By use of ballistic capabilities, provide cover and/or observational positions for person isolation/containment.
- **Tactical Medic Response**  
Transport and provide ballistic protection to Tactical Medics

- 
- The one-time cost = \$138,000 + Sales Tax. Due to the anticipated long life span of the vehicle (due to expected low mileage) staff is recommending utilization of public safety impact fees for the acquisition of the vehicle.
  - Ongoing maintenance and replacement costs will be incorporated into the annual department operating budget.

### **Recommendation**

1. Authorize the purchase of an armored rescue vehicle; and
2. Approve budget adjustment allocating one time use of public safety impact fees for the acquisition; and
3. Direct the Independent Police Auditor to review and provide feedback on a departmental vehicle use policy to be developed by the Police Chief prior to vehicle deployment.
