

DAVIS POLICE DEPARTMENT **PATROL 40MM LESS LETHAL OUTLINE**

Training Guidelines

The Davis Police Department is committed to reducing the potential for violent confrontations when suspects are encountered. Circumstances may require the use of selected control devices which may aid in the apprehension of suspects or the prevention of violent crime. Impact munitions, when used properly, are less likely to result in death or serious physical injury than other types of force.

The Davis Police Department authorizes the use of the Defense Technology single/double action single shot launcher combined with the eXact iImpact 40mm Sponge Round for use by Patrol Officers. This block of instruction is intended to train Patrol Officers in their use and capabilities.
