Historic Context

In 2015, the Davis, California: Citywide Survey and Historic Context Update was prepared to provide a framework for the evaluation of 20th century resources within the City of Davis. It provided an updated historic context statement focusing on the World War II and post-war periods, evaluation criteria, and significance themes. The significance themes include Native American, Spanish, and Mexican Era (prehistory – 1847); Pioneer and Railroad Era (1848 – 1904); University Farm and University of California Era (1905 – present); Early Twentieth Century and Depression Era (1905 – 1939); World War II and Post-War (1940 – 1958); Explosive Growth (1959 – 1971); and Progressive Visions, Managed Growth (1972 – 2015). The subject property was originally constructed in 1929; therefore, it falls in the University Farm and University of California Era (1905 – present) and Early Twentieth Century and Depression Era (1905 – 1939) significance themes established in the 2015 historic context.

The following early history of the City of Davis is taken from the *Davis, California: Citywide Survey and Historic Context Update*.¹

American settler Joseph Chiles bought a portion of the Rancho Laguna de Santos Calle, which he resold to his son-in-law Jerome Davis in 1854. Davis established a dairy and other ventures, and eventually his land holdings grew to 12,000 acres. After California became a state in 1850, other farmers, many of them German immigrants, began to settle in the area. Yolo County quickly became a prosperous farming region focused on grain, livestock and orchard crops.

In the 1860s, a group of five investors sometimes called the “Big Five” began planning a railroad routed through Davis’ ranch, and by 1868 the California Pacific Railroad had built its line to the area, laying out the three-way junction in its present location and alignment, where the Woodland branch line turned north from the main line. The railroad also constructed a depot and laid out a town around it as a speculative investment.

The arrival of the railroad was a turning point, creating an economic impetus to found a town out of what had previously been a collection of scattered farms. The railroad’s investors laid out the town site adjacent to the depot, and by 1868 Davisville had about 400 residents. The railroad and new population spurred a brief building boom, but by the 1870s local growth had slowed. Davisville during the late nineteenth century was a farm village devoted to processing, storing, and shipping agricultural products. There was also industrial activity along the railroad tracks, some of which, like the lumber-yard, served the town in general. Most of the industry, however, was related to agriculture in one way or another, such as the Schmeiser manufacturing plant, on the east side of the railroad tracks with buildings on both sides of what is now Third street, which built almond hullers.

After the railroad provided an economic impetus for a town, commercial establishments quickly sprang up to serve local residents. In addition to the farming-related businesses that were the community’s *raison d’être*, blacksmiths, carpenters, livery stables, and wagon-makers established businesses. A post office and express office provided access to the world beyond Davis, and hotels, restaurants, saloons, and boarding houses catered to travelers. Retail businesses such as grocery stores, butchers, liquor stores, and clothing stores opened, as did a doctor’s office and shoe repair shop. With warehouses and industrial services concentrated along the railroad tracks, downtown was clustered between First and Third Streets on G Street, a block west of the depot and tracks. A short-lived weekly newspaper was founded in 1869, and the Davis Enterprise began publishing in 1897. In addition to all the commercial activity, local residents established an Odd Fellows Lodge and Presbyterian and Roman Catholic churches.

¹ Brunzell Historical. *Davis, California: Citywide Survey and Historic Context Update*. November 2015.

With the tiny downtown located on G Street, residential development began around F Street just one more block to the west. Individual property owners built houses one at a time, and the availability of land meant that during the nineteenth century many blocks had only one or two houses set on large parcels. The gradual population growth of this area (ten residents a year) meant that residential construction proceeded at a measured pace. At the turn of the twentieth century, Davis did not have a single residential block that was completely built-out in the modern sense. The original town plat easily accommodated the gradual growth of the little town, and the only major subdivision was Rice's Addition in 1888, which was four small blocks along Rice Lane between the University campus and B Streets [just south of the subject property].

The following excerpt is from the Davis, California: Citywide Survey and Historic Context Update.

Early Twentieth Century and Depression Era (1905 – 1939)²

In 1905, Davisville experienced a second momentous economic turning point when Governor George Pardee established a commission to find a site for a University Farm. The University of California (which at the time was what is now known as UC Berkeley) had an agriculture department, but California legislators wanted a dedicated university farm located in a rural area where practical farming techniques could be taught, and where Berkeley instructors could easily travel. Communities state-wide competed for the farm, but Davis boosters ultimately won by underwriting the land sale to the University of California, purchasing water rights and promoting Davis as conveniently accessible from the Bay Area via railway. The first building was constructed in 1907, and the Farm began a period of rapid growth. The University Farm brought state investment and a well-educated population to town.

In 1906, after the UC Regents announced the location of the University Farm, the publisher of the Davisville Enterprise changed the paper's name to the Davis Enterprise, to celebrate Davis becoming a more important place. Local residents agreed, and in 1907, the U.S. Postal Service changed the name of the post office, and the town officially became "Davis." In 1922, the campus began its first four year degree program, and initiated a campus development plan the same year. By 1930, the University Farm encompassed 1,000 acres.

Municipal Growth

Changing its name to "Davis" was a symbolic first step toward the growth of the little village into a more substantial and prosperous town. In addition to the economic boost provided by the University Farm, a devastating downtown fire in 1916 spurred an interest in formalizing municipal government. In 1917, Davis incorporated as a city, setting off a decade of civic improvements and additions to city services. Davis developed a water system in 1920, and sewer and garbage collection followed the next year. Davis government then undertook significant road improvements, tree planting, and streetlight installation. In 1923, citizens proposed a long-range development plan, and a more formalized plan was developed in 1927 when the city retained professional planner Charles Cheney. Cheney's Davis plan, most of which was never adopted, included urbane elements such as transforming Second Street into a formal allée culminating in a classical quadrangle at the University Farm entrance. Although some of Cheney's ideas were perhaps too grand for Davis, his proposal for devoting an entire block to a park was carried out in spirit when the Federal Works Progress Administration (WPA) built a park with landscaping, paths, and restrooms on the block between Fourth, Fifth, B, and C streets in the 1930s.

Commercial and Residential Development

During the early twentieth century Davis' commercial district began to spread to the west and north, and its original wood-frame buildings were replaced with more substantial masonry structures as the town prospered. During the teens and 1920s banks, theaters, and new commercial buildings diversified Downtown Davis. Residents constructed new churches and lodge buildings during this period to serve the growing population. The Davis Community Church, a city landmark, was built during this era. Early developers subdivided several ranches adjacent to the little town into residential parcels after the establishment of the University Farm. Residential development continued to increase its pace, particularly in the 1920s when prosperity, population growth, and alterations in mortgage practices fueled a construction boom [...]

Depression-era Davis

Davis was somewhat insulated from the dire problems experienced in many parts of the U.S. during the 1930s, and did not experience bread lines, labor unrest, or severe unemployment. At the same time, Davis

² Brunzell Historical, *Davis, California: Citywide Survey and Historic Context Update*, 2015, page 8.

benefited from some of the federal economic stimulus programs of the era. In addition to its first public park, which was built by the WPA, Davis built a new city hall and fire station during the 1930s. Although residential construction slowed, it did not halt completely as in some areas, and a number of new houses were built in College Park and the Old North neighborhood.

Subject Property

The property was constructed in 1929 on a 12,900 sq.ft. lot. This one story, L-shaped vernacular building is topped by two intersecting gables. The front and north walls are constructed of rammed earth. The remainder was built of adobe brick. Wood headers top the openings and the gables are faced with vertical wood siding. The house has a tall brick wall surrounding it. Extensive remodeling has occurred at this house. What portions of the original house that remain are few. However, it is the only adobe house in Davis and its construction is related to the University. The front part of the house was built as a class project by students in J. D. Long's civil engineering class in 1929. The north wall and front facade were constructed by the rammed earth method, the rest of the house was made with adobe brick. The back bedroom addition was completed in 1935. Mr. Long retired in 1960 and moved to Kansas. The house was rented out to students and faculty members of the nearby U.C. campus until it was purchased by Maynard Skinner, a former Davis mayor.³

The house has undergone a series of alterations including the insertion of large, glazed gable ends. It is now surrounded by a high brick wall and is largely closed off from view. The house was identified in both the 1982 and 1996 surveys. Most of the more dramatic alterations to the building were undertaken in the period between those two surveys

Regulatory Framework

National Register of Historic Places

A property is eligible for listing in the National Register of Historic Places (National Register) if it meets the National Register listing criteria at 36 CFR 60.4, as stated below:

The quality of significance in American history, architecture, archaeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association and that:

- A) Are associated with events that have made a significant contribution to the broad patterns of our history, or
- B) Are associated with the lives of persons significant in our past, or
- C) Embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction, or
- D) Have yielded, or may be likely to yield, information important in prehistory or history

California Register of Historical Resources

To be eligible for the California Register of Historical Resources (California Register) a historical resource must be significant under one or more of the following criteria:

- 1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
- 2. Is associated with the lives of persons important in our past;
- 3. Embodies the distinctive characteristics of a type, period, region, or method of construction, represents the work of an important creative individual, or possesses high artistic values; or
- 4. Has yielded, or may be likely to yield, information important to prehistory or history.

City of Davis Landmark Resource

In addition to the National and California registers, the City of Davis provides for the additional designations of Landmark Resource and Merit Resource in their Historical Resources Management Zoning Code (40.23.060). To be eligible as a Landmark a resource must meet at least one of the four criteria at the local, state, or national level of significance and retain a high level of historic integrity.

- (1) Associated with events that have made a significant contribution to the broad patterns in the history of Davis, California, or the nation; or
- (2) Associated with the lives of significant persons in the history of Davis, California, or the nation; or
- (3) Embodies the distinctive characteristics of a type, period, architectural style or method of construction; or that represents the work of a master designer; or that possesses high artistic values; or that represents a significant and distinguishable entity whose components may lack individual distinction; or
- (4) Has yielded or may likely yield archaeological or anthropological information important in the study of history, prehistory, or human culture.

The following factors must also be considered:

- (1) A resource moved from its original location may be designated a landmark if it is significant primarily for its architectural value or it is one of the most important surviving structures associated with an important person or historic event.
- (2) A birthplace or grave may be designated a landmark if it is that of a historical figure of outstanding importance within the history of Davis, the state or the nation and there are no other appropriate sites or resources directly associated with his or her life or achievements.
- (3) A reconstructed building may be designated a landmark if the reconstruction is historically accurate and is based on sound historical documentation, is executed in a suitable environment, and if no other original structure survives that has the same historical association.
- (4) A resource achieving significance within the past fifty years may be designated a landmark if the resource is of exceptional importance within the history of Davis, the state or the nation.

City of Davis Merit Resource

In addition to the National and California registers, the City of Davis provides for the additional designations of Landmark Resource and Merit Resource in their Historical Resources Management Zoning Code (40.23.060). To be eligible as a Merit Resource must meet at least one of the four criteria and retain a high level of historic integrity. The four criteria to qualify as a Merit Resource as nearly identical to those for a Landmark except that Merit Resources only consider local significance.

The following factors must also be considered:

- (1) A resource moved from its original location may be designated a merit resource if it is significant for its architectural value or if an understanding of the associated important person or historic event has not been impaired by the relocation.
- (2) A birthplace or grave may be designated a merit resource if it is that of a historical figure of outstanding importance within the history of Davis and there are no other appropriate sites or resources directly associated with his or her life or achievements.
- (3) A reconstructed building may be designated a merit resource if the reconstruction is historically accurate and is based on sound historical documentation, is executed in a suitable environment, and if no other original structure survives that has the same historical association.
- (4) A resource achieving significance within the past fifty years may be designated a merit resource if it is of exceptional importance within the history of Davis.

Even if a resource is not listed in, or determined eligible for listing in, the California Register, the lead agency may consider the resource to be a "historical resource" for the purposes of CEQA provided that the lead agency determination is supported by substantial evidence (CEQA Guidelines 14 CCR 15064.5).

Evaluation

The subject property at 222 University Avenue was constructed in 1929 and surveyed in 1980, 1996, 2003, and 2015. It was determined to no longer retain enough integrity to be considered historic however, the previous efforts did not include complete evaluations for the National Register, California Register, or locally as a Davis Landmark or Davis Merit Resource. The following is an evaluation for potential historic significance under National Register Criteria A through D, California Register Criteria 1 through 4, Davis Landmark Criteria 1 through 4, and Davis Merit Resource Criteria 1 through 4. While the wording is slightly different for each of the four criteria for the National Register, California Register, Davis Landmark, and Davis Merit Resource eligibility, they each align to cover the same potential significance criterion. A/1/1/1 covers associations with significant historical events, B/2/2/2 covers significant people, C/3/3/3 covers significant architecture, and D/4/4/4 covers the information potential of a site.

A/1/1/1 - Events

222 University Avenue was built as a classroom project for a university class in 1929, however archival review does not indicate that it does not appear to rise above the typical associations with single-family residential development or the contextual period of development. It does not appear significant for its association with the University, teaching methods, or educational programs at the time. Therefore, it is recommended ineligible under Criteria A/1/1/1.

B/2/2/2 – Persons/Businesses

Archival review also does not indicate that there are any significant associations between 222 University Avenue and significant persons or businesses. While it was purchased in the 1960s by Maynard Skinner, a former mayor of Davis, his period of residence at 212 University Avenue is not associated with the productive period of his tenure as mayor. As research does not indicate that University Avenue is significantly associated with the productive life of any significant person or business, it is recommended ineligible under Criteria B/2/2/2.

C/3/3/3 – Design/Engineering

Although its design, form, and decoration are not remarkable, the structure is an interesting engineering product and is unique in Davis in terms of material and construction techniques, being the only adobe structure in Davis. The front façade of the building was constructed by a civil engineering class in 1929 and reflects the vernacular construction. While interesting, the design does not appear to have been influential on residential design in the area. It does not represent innovative building techniques or especially significant adaptations of traditional construction methods. For these reasons, the subject property at 222 University Avenue is recommended ineligible under Criteria C/3/3/3.

D/4/4/4 – Information Potential

Criterion D/4/4/4 applies to properties that have the potential to inform important research questions about human history. According to National Register Bulletin 15, to qualify for listing, the property must "have or have had information to contribute to our understanding of human history or prehistory and the information must be considered important." 222 University Avenue does not meet this criterion and therefore is recommended ineligible under Criteria D/4/4/4.

Integrity

For a property to be eligible for listing in the National Register, California Register, or as Landmark or Merit resources per the City of Davis regulations it must meet one of the eligibility criteria discussed above as well as retain sufficient integrity. However, the subject property does not meet any of the eligibility criteria for significance; therefore, a discussion of integrity is not necessary.

Recommendation

ESA recommends 222 University Avenue ineligible for listing in the National Register, California Register or locally as a Davis Landmark or Merit Resource but is an important contributor to the area neighborhood.
