

Exhibit G

Example of a “Typical” Senior Community Under Construction in Lincoln
Project being constructed by TaylorMorrison

Esplanade at Turkey Creek – Lincoln, CA

Esplanade at Turkey Creek

Builder: TaylorMorrison

Community Characteristics:

- 55+
- Gated
- Home sizes: 1,408 – 2,985 square feet
- Single Story
- No walking paths on-site – these are located off-site in preserved open space
- No walking paths around the homes. Any paths within the development are short and located around the Clubhouse and possibly the future park. Any walking done around homes is on sidewalks. There is a path around the outside of the development but with no connections to inside streets or to the interior of the subdivision.
- This looks like any other subdivision. Other than having a community center, it looks like any other un-age restricted, master planned subdivision.
